OVERVIEW

Water - An imperative to human life. It is the most crucial element needed for human activity on the planet. Punya Aqua Company & our product **"Oxyriva"** has already gained the place & popularity across the market as clean & tasty drinking water that is fueled with minerals to boost health & add freshness. With our supreme standards in quality drinking water, we have grown & expanded our services to new heights & planning the same to develop a pan India distribution.

Oxyriva packaged drinking water is processed at its highly advanced, innovative & fully automatic filtration unit. With added minerals, Oxyriva keeps the brain hydrated to reduce stress, headaches and improve concentration. Punya Aqua Company dreams of facilitating the quality & healthy drinking water across India. Oxyriva has already been able to create a unique vocation among the consumers with its range of luscious, healthy and easily commercially available drinking water.

With our new approach, we are continuously looking to establish ourselves as the fresh, hygienically healthy drinking water merchant. Our devotion towards work keeps us engaging in making our services & products better to win trust of consumers and build a lifelong relationship.

By incorporating the latest technology for water filtration & water packaging technology, we use our wide network for distribution of our best drinking quality drinking water. With an appropriate amount of dissolved minerals, the Oxyriva is a drinking water that is great in taste, healthy and increases immunity.

OUR PHILOSOPHY
